

EC Coilformers, Vertical

The coilformers are made in gfr Polyamide PA66 of type p6g (RTI long-range temperature +125°C). Pin material is tin bronze, tinned for solder-pins and brass, tinned for solder-tags. Maximum solder temperature 350°C, 2 sec. Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/inch.

The coilformers are suitable for automatic winding on computer controlled machines. The EC solder-tags are for side-wrapping and soldering. Since the lower ends of the solder-tags fit cleanly into the pcb, cold solder-joints are eliminated.
