

## RM-SMD Coilformers (fu)

The coilformers are made in gfr Polyphenylene Sulfide PPS of type torA504 (RTI long-range temperature +130°C) and made in gfr Polyamide PA66 of type A3X2G10 (RTI long-range temperature +115°C) and are suitable for reflow soldering.

Pin material: tin bronze, tinned.  
Special materials – e.g. irradiated cross-linked – and designs on request, dimensions in mm/[inch](#).

The coilformers are fitted with U-shaped terminals. The two sides of the terminals allow automatic binding-on and soldering of the wires, leaving the pcb-side of the terminal free from tin. The tolerance compensator TA on the top flange eliminates the otherwise required insulation washer.

| Type                                        | Order-Code | Accessories                                                                                  |
|---------------------------------------------|------------|----------------------------------------------------------------------------------------------|
| Coilformer: RM 5-LP-SMD2/1k/8f-625-/torA504 | 90542-132  |                                                                                              |
| Coilformer: RM 5-LP-SMD2/2k/8f-625-/torA504 | N0332-132  |  on request |
| Solder-pin: fu625-67/ub                     | 75826-213  |                                                                                              |
